

# Supply Chain & Logistics

The Supply Chain sector in Ireland has expanded rapidly over the last few years. There have been significant changes and developments across a wide range of sectors in relation to quality, production, costs and logistics. New legislation means that firms are required to demonstrate complete accountability across their entire supply chain process. With an efficient supply chain procedure in place, organisations can plan solutions to possible disruptions in the supply chain process. This cross-functional approach to managing the movement of both raw materials and finished goods has led to new positions being created across a range of industry sectors.

In response to these market changes, Brightwater set up a specialist Supply Chain & Logistics desk in 2005 to cater for mid level to executive level positions. Our dedicated Supply Chain & Logistics team is staffed by highly skilled recruitment consultants ensuring your staffing needs are managed in a proactive rather than a reactive manner.

## Brightwater's Supply Chain & Logistics division recruits in the general areas of:

- FMCG
- Distribution
- Pharmaceutical
- Retail

Brightwater recognises the importance of serving specialist global industry sectors and the need for an industry-focused approach to the recruitment process. Customers in all geographies and sectors face supply chain challenges that impact business performance and competitive positioning and thus the number of opportunities within the supply chain sector has grown dramatically.
